Looks good, offers a lot and is an ICY BOX, what else?

The ICY BOX IB-2221StU-B is a JOBD enclosure for two 2.5"-SATA HDDs. JBOD = Just a Bunch Of Disks means, the two HDDs are recognized as individual drives, which requires only a single USB connection with the computer. Thus it is up to you which data you deliver to which drive.

The enclosure is compact and solid, it is made of aluminium. It takes in two HDDs with a height of up to 9.5 mm. Each can provide up to 1 TB storage capacity. As a matter of course the IB-2221StU-B also works with only one drive mounted.

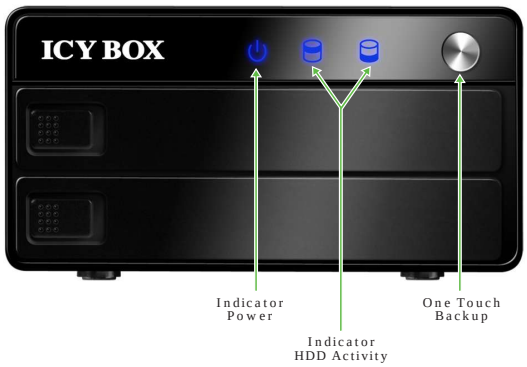
Front side



**EasySwap®

With the patent-protected EasySwap®-mechanism you can install your SATA-HDD incredible fast: You just need to insert the HDD and close the cover. You don't need any screws and screwdrivers. A HDD change is also very easy: just take out the old HDD and slide in the new one. So you can use the one case for all of your HDD's with different data.
